Lesson	Content	Class Date
FA-01 Basic Functions of Fire Alarm Systems		
	Objective FA-01-1: Describe the life safety functions of a fire alarms system.	
	Objective FA-01-2: Describe the basic function of the fire alarm control unit.	
	Objective FA-01-3: Describe the basic function of the initiating devices.	
	Objective FA-01-4: Describe the basic function of the notification appliances.	
	Objective FA-01-5: Describe the basic function of mass notification.	
	Objective FA-01-6: List the procedures to follow when working on an existing fire alarm system.	
FA-02 Types of Fire Alarm Systems		
	Objective FA-02-1: Describe the function of a conventional fire alarm system.	
	Objective FA-02-2: Describe the function of a multiplexed fire alarm system.	
	Objective FA-02-3: Describe the function of an addressable fire alarm system.	
	Objective FA-02-4: Describe the function of a household fire alarm system.	
	Objective FA-02-5: Describe the function of single- and multiple-station smoke alarms.	
FA-03 Overview of Fire Alarm System Types		
	Objective FA-03-1: List the types of installations where household fire alarm systems are installed.	
	Objective FA-03-2: Describe the purpose of and explain the operation of municipal fire alarm systems.	
	Objective FA-03-3: Explain the operation of an auxiliary fire alarm system.	
	Objective FA-03-4: Explain the operation of protected premises (local) fire alarm systems.	
	Objective FA-03-5: Describe the types and operation of supervising station service fire alarm systems.	
	Objective FA-03-6: Describe a combination fire alarm system.	
	Objective FA-03-7: Describe the purpose of emergency voice/alarm communication systems.	
	Objective FA-03-8: Describe the purpose and operation of a fire alarm command center.	
FA-04 Fire Alarm Control Units and Associated Functions		
	Objective FA-04-1: Describe the basic function of the fire alarm control unit (FACU).	
	Objective FA-04-2: Describe the basic function of the FACU power supply.	
	Objective FA-04-3: Describe the supervision, monitoring, and processing of the FACU.	
	Objective FA-04-4: Describe the status and annunciation of the FACU.	
	Objective FA-04-5: Describe off-premises transmission methods.	
	Objective FA-04-6: Describe protection and early detection at the FACU.	

# Table of Contents

Lesson	Content	Class Date
FA-05 Fire Alarm System Initiating Devices		
Objective FA-05-1:	Describe the basic function of manually actuated initiating devices (manual fire alarm boxes).	
Objective FA-05-2:	Describe the basic function of automatic heat detectors.	
Objective FA-05-3:	Describe the basic function of automatic smoke detectors.	
Objective FA-05-4:	Describe the basic function of waterflow switches.	
Objective FA-05-5:	Describe the basic function of radiant energy fire detectors.	
Objective FA-05-6:	Describe the basic functions of CO Detectors.	
Objective FA-05-7:	Describe the basic functions of supervisory initiating devices.	
FA-06 Fire Alarm Notification Appliances		
Objective FA-06-1:	Describe the basic types of notification appliances.	
Objective FA-06-2:	Describe public mode, private mode, and sleeping area requirements.	
Objective FA-06-3:	Describe notification systems and their installation.	
Objective FA-06-4:	Describe notification rule of thumb design requirements.	
FA-07 Fire Alarm Circuits and Pathways		
Objective FA-07-1:	Describe the types of non-power-limited fire alarm circuits.	
Objective FA-07-2:	Describe the types of power-limited fire alarm circuits.	
Objective FA-07-3:	Describe cable and wire types, and applications requirements.	
Objective FA-07-4:	Describe circuit types and monitoring for integrity.	
Objective FA-07-5:	Describe the basic requirements of surge protection.	
FA-08 Supervising Station Alarm Systems		
Objective FA-08-1:	Describe the operations of a public emergency alarm reporting system.	
Objective FA-08-2:	Describe the operations of a supervising station service.	
Objective FA-08-3:	Describe the operations of digital alarm communications.	
Objective FA-08-4:	Describe the operations of cellular and RF communications.	
Objective FA-08-5:	Describe the operations of Internet communications.	
FA-09 Fire Alarm Systems—Inspection, Testing, and Maintenance (ITM)		
Objective FA-09-1:	Describe the fire alarm system general requirements for inspection and testing.	
Objective FA-09-2:	Describe the fire alarm system inspection requirements.	
Objective FA-09-3:	Describe the fire alarm system testing requirements.	
Objective FA-09-4:	Describe the fire alarm system maintenance requirements.	
Objective FA-09-5:	Describe the fire alarm system documentation requirements.	

# Table of Contents

Lesson	Content	Class Date
FA-10 Unwanted Alarm Prevention		
	Objective FA-10-1: Describe general unwanted alarm prevention criteria.	
	Objective FA-10-2: Describe unwanted alarm prevention for the fire alarm control unit (FACU).	
	Objective FA-10-3: Describe unwanted alarm prevention of the fire alarm initiating devices.	
	Objective FA-10-4: Describe the NEMA rating of electrical enclosures.	
	Objective FA-10-5: Describe state and local code requirements.	
FA-11 Circuit Testing		
	Objective FA-11-1: Review basic fire alarm circuits.	
	Objective FA-11-2: Describe conductor testing for fire alarm system circuits.	
	Objective FA-11-3: Describe troubleshooting procedures for fire alarm system circuits.	
	Objective FA-11-4: Review the lab safety procedures and policies adopted in your lab and perform a circuit testing lab.	
FA-12 Emergency Communications Systems		
	Objective FA-12-1: Describe the life safety functions of an emergency communications system.	
	Objective FA-12-2: Describe the basic function of the emergency communications control equipment.	
	Objective FA-12-3: Describe the basic function of the emergency communications system initiating devices.	
	Objective FA-12-4: Describe the basic function of the emergency communications system notification appliances.	
	Objective FA-12-5: Describe other layers of emergency communications systems.	
	Objective FA-12-6 : NICET Exam Preparation – Optional
