

Introduction.....	5
Lesson Objectives	5
Lesson 1: The Basics	6
Objective 1: Describe The Limited Energy Industry and Explain The Role of A Limited Energy Technician	6
Objective 2: Describe Professional Ethics and Conduct at The Work Place	7
Objective 3: Explain How Limited Energy Installations Are Affected by National Electrical Code and Industry Standards	9
Objective 4: Be Able to Recognize Various Tools and Test Equipment Used for Limited Energy Electrical Installations.....	12
Objective 5: Recognize The Importance of Job-Related Paperwork	19
Lesson 2: Safety	21
Objective 1: Describe How OSHA and State/Local Agencies Impact Limited Energy Electrical Installations	21
Objective 2: Describe The Types of PPE Used for Limited Energy Installations.....	22
Objective 3: Explain The “Lock Out – Tag Out” Process and What Items Are Required to Properly Perform The Task	25
Objective 4: Describe The Requirements of Portable Ladder Safety and Fall Protection	26
Objective 5: CPR certification	28
Lesson 3: National Electrical Code and Industry Standards.....	29
Objective 1: Demonstrate The Ability to Find NEC (NFPA 70) Code Articles Pertaining to Limited Energy Installations	29
Objective 2: Explain How The NEC Is Arranged and What It Covers (Article 90)	30
Objective 3: Describe Other Electrical Code (NEC) State and Local Enforcement Requirements for Limited Energy Systems	32
Objective 4: Describe How NEMA, NFPA, and Other Nationally-Recognized Industries Influence Limited Energy Installations	33
Lesson 4: Math & Algebra Review	34
Objective 1: Solve Basic Algebra Equations	34
Objective 2: Convert Measurements and Values from Metric (SI) to English	35
Objective 3: Convert Decimal Feet into Feet and Inches Measurements	36
Objective 4: Calculate The Area, Volume, and Angles of Basic Geometric Shapes	37

Objective 5: Determine Scientific Notation, Roots, and Powers of Numbers.....38

Lesson 5: Electrical Math39

Objective 1: Solve Equations Using Ohm’s Law.....39

Objective 2: Solve Equations Using Power Law41

Objective 3: Describe The Metric System Prefixes and How They Relate to Limited Energy Systems.....44

Objective 4: Convert Numbers into Binary and Hexadecimal Equivalent Values45

Lesson 6: Residential Installations46

Objective 1: Identify The Common Materials Used in Residential Construction (Wood, Masonry, Drywall, Etc.).....46

Objective 2: Describe The Major Framing and Structural Components in Residential Construction58

Objective 3: Select The Proper Types of Anchors, Fasteners, and Drill Bits Used for Various Types of Residential Construction Materials (Wood, Masonry, Drywall, Etc.)67

Objective 4: Identify Key Areas of NEC Article 300 That Apply to Limited Energy Electrical Installations68

Objective 5: Describe The Difference between Class 2 and Class 3 Circuits (NEC Article 725)69

Lesson 7: Commercial/Industrial Installations70

Objective 1: Identify The Common Materials Used in Commercial Construction (Concrete, Steel, Drywall, Etc.)70

Objective 2: Describe The Tools and Process to Create Openings in Concrete and Steel (certifications? Powder actuated tools)71

Objective 3: Select The Proper Type of Anchors, Fasteners, and Drill Bits Used for Various Types of Commercial Construction Materials (Concrete, Steel, Drywall, Etc.) 72

Objective 4: Describe The Process of Firestopping and The Different Methods Used to Restore Hourly Ratings73

Lesson 8: DC Electronic Circuits.....74

Objective 1: Describe The Different Units of Measurement of Electrical Properties....74

Objective 2: Describe The Basic Properties of Series, Parallel, and Series-Parallel Electrical Circuits.....75

Objective 3: Solve Equations Using Ohm’s Law for Unknown Values in Series, Parallel, and Series-Parallel Circuits87

Objective 4: Solve Current Equations Using Kirchhoff’s Law for Series, Parallel, and Series-Parallel circuits.....88

Objective 5: Solve Voltage Drop Equations Using Kirchhoff's Law for Series, Parallel, and Series-Parallel Circuits	89
Objective 6: Explain Different Ways Voltage Can Be Produced and Give Examples Used in Limited Energy Installations.....	92
Objective 7: Explain What Conductors and Insulators Are and Why They Are Used in Electrical Circuits	94

Lesson 9: Conduits, Raceways, Pathways, and Spaces96

Objective 1: Describe The Different Types of Raceways and Cable.....	96
Trays Used for Limited Energy Installations	96
Objective 2: Identify The Various Types of Conduits, Boxes, and.....	97
Fittings Used for Limited Energy Electrical Installations	97
Objective 3: Describe The Different Methods Used to Install.....	98
Raceways, Cable Trays, and Conduits.....	98
Objective 4: Identify Various Types of Cable Support Methods	99
Used for Limited Energy Installations	99
Objective 5: Identify NEC Articles That Apply to Various Conduits,	100
Raceways, and Cable Trays and Their Installation Methods	100
